E4/ANT/2012/KPCS/

annexe(s)

It is of utmost important that the data of export declarations are correct and accurate.

Discrepancies, even minor ones, between the data mentioned on the invoice and the Kimberley Process Certificate cause major difficulties at destination, such as seizures and delays for import in some importing countries.

The amount of administrative burden is not always in relation to the discrepancy if it concerns the name and address of the consignee.

Therefore, we urge you to pay special attention for all the data, and more specific the data of the consignee (name and address) in export declarations for rough diamonds when preparing the documents and invoices.
